

# petroleum & refining

# W

We continually meet the specialized needs of the petroleum industry through cost-effective and timesaving means. Our thorough knowledge of the industry and commitment to safety have helped us to develop innovative and quality approaches to projects, such as our Fire Watch and Hole Watch programs.

These programs, which coordinate several trades through one contractor, have an outstanding safety record and save our clients more money than traditional programs.

Hire the contractor you can trust to work with your most important assets – your product and your people. Amoco, CITGO, bp, Marathon, and Exxon Mobil are just a few of the companies who have put their trust in us.

***“Built with safety and quality. Another great team effort by Scheck. Once again, you have proven to be a valued contractor.”***

***–Ralph Brand, Fluor Corporation,  
CITGO Tier 2 project***
