

“Our company prides itself on having the depth of organization, certifications, and the trained, qualified and experienced team to handle a wide range of power projects and outages for the nation’s largest power producers.”

*–Jack Hite,
Quality Control Manager,
Scheck Industries*

power

Scheck offers a successful integration of experience and skill with state-of-the-art equipment and components to achieve the highest quality solutions at the most competitive prices. Our ability to do so is unmatched in the industry.

We are repeatedly called upon to handle projects ranging from heavy wall main systems to instrument installation and calibration. Consumer Power, Exelon Corporation, NIPSCO, Commonwealth Edison and Southern Illinois Power Cooperative are just a few of the names in the power industry that have continually chosen us to solve their critical piping needs.

Administrative and technical expertise, coupled with our strict adherence to safety standards, makes us an industry leader and your partner in excellence.
